

ALPHA OMEGA TECHNOLOGIES

VOID WALKER

FIELD MANUAL

Your phone is the cockpit. Your gear stays yours.

WELCOME, OPERATOR

You bought a lifetime unlock. This guide assumes nothing.

We walk every button like it is day one.

No root. No dual-boot. Install like a normal Android app.

Armor · Call Gate · Shield · War Room · Rune Term — all inside.

FOR THE PERSON WHO JUST UNLOCKED THE APP

Keep your license key safe. We do not reissue lifetime keys.

Support: admin@alphaomegatech.net · voidwalker.app

Christ is King.

What you just got

PLAIN ENGLISH · ZERO JARGON REQUIRED

Void Walker is digital armor for your Android phone. It watches the network, can filter spam calls, can block apps from talking on Wi-Fi or mobile data, keeps a log when something looks weird, and includes a full terminal cockpit so your phone can reach PCs and labs you already own — without rooting the phone.

FULL ARMOR

One-tap protection profiles. Turn armor on when you care; off when you want quiet.

CALL GATE

Spam and unknown call filter. VIP allow-list, quiet hours, permanent block, unblock.

VOID SHIELD

Per-app firewall. See who is transmitting. Measure Wi-Fi link strength.

WAR ROOM

Tripwire alerts, practice drills, app/file risk tools, timeline log.

DECOY ID

Fake traffic / persona trails so snoopers chase ghosts.

RUNE TERM

Power shell on the phone (optional). Reach your own machines. No root.

HONEST LIMITS (we tell you up front)

- Not a full desktop antivirus / Play Protect replacement (Seraphim is growing).
- Not a commercial VPN brand or cloud PC rental.
- Not magic that names attackers. It helps you notice, log, filter, and control.

Install from zero

ANDROID 8+ · DIRECT PACKAGE · COM.VOIDWALKER.APP

1 Find your package + key

After purchase you got: (1) the APK install file, (2) a lifetime key that looks like VW-D-XXXX-XXXX-XXXXX, (3) a short README.
If you lost the APK: voidwalker.app/downloads/VoidWalker-direct-latest.apk
SAVE THE KEY in a password manager + screenshot. We do not reissue keys.

2 Open the APK on your phone

On the phone, open Files / Downloads and tap VoidWalker-direct-latest.apk.
If Android says install is blocked: Settings → allow install from that app
(Files, Chrome, or Gmail) → Install → Open.

3 First open — Terms

You will see a first-run notice. Read it. Tap I AGREE.
This is the full Family / direct channel app (not a thin Play lite build).

4 Activate your lifetime key

Paste your VW-D key into Activate / License.
Turn on Wi-Fi or mobile data for one moment so the phone can confirm.
Success unlocks up to 3 devices on the same key for life.

5 Say yes to permissions (when asked)

Notifications → so alerts can reach you.
Location → Android requires it for Wi-Fi name / network watch features.
Files / All files → only if you use Seraphim file scan / Dust Sweep.
VPN prompt → only when you turn on Void Shield (normal for app firewalls).

6 Arm protection

Bottom bar → Home → tap Full Armor of God.
Status should look Activated / on (often a bright green glow).
Tap again later to disarm when you want fewer alerts.

The buttons at the bottom

MEMORIZE THESE SEVEN · THAT IS THE WHOLE APP

HOME

Your main switch. Full Armor of God — arm / disarm. Live armor status.

DECOY ID

Personas and decoy traffic trails. Optional. Use when you want noise that is not you.

WAR ROOM

Alerts, ArchAngels tripwires, practice drills, Seraphim (apps/files), Demon log.

VOID SHIELD

Per-app allow/block on Wi-Fi and mobile data. Wire Gauge = link strength right now.

RUNE TERM

Advanced shell. Skip until you want SSH / packages. Power users live here.

PATROL

Schedules — when watch windows run (after-hours, etc.).

ENGINE

Settings, license info, About, Support, in-app How-to guides.

LAYMAN RULE

If you only use Home + Call Gate + Void Shield, you already got your money's worth.

Day-one mission

ARMOR FIRST · THEN OWN YOUR CALLS

A) Full Armor of God (Home)

Think of this as putting on the suit. One tap turns on the protection profile. You may see names like cover-me, public-wifi, or night-watch — pick what matches the moment. Shadow runs quiet decoy chaff. Smart runs ArchAngels watchers. VOID is a louder burst when you choose it.

- › Home → Full Armor of God → confirm Activated.
- › Disarm the same way when you want silence.
- › If status says Incomplete, finish the permissions it asks for.

B) Call Gate (call filter)

Call Gate is not a texting app. It filters phone calls. Unknown and spam numbers do not get to run your day. You decide: block forever, quiet, or VIP allow.

- › Open Call Gate (from War Room / product menus depending on build).
- › VIP list = people who always get through (family, boss, doctor).
- › Block list = permanent no. Unblock is right there if you change your mind.
- › Stopped by gate = numbers the filter held. Allow (VIP) if it was a real person.
- › Quiet hours = fewer rings when you sleep.
- › Lists start folded closed so the screen is calm — expand only what you need.
- › For SMS / texting, keep using your normal Messages app.

PRACTICE (safe)

1. Add your own second number (or a friend) to VIP.
2. Have them call once — confirm it rings.
3. Toggle quiet hours for tonight only if you want to test.
4. If a real person gets stopped: open Stopped / Log → Allow (VIP) or Unblock.

Shield · War Room · Decoys

OPTIONAL POWER · STILL BEGINNER-SAFE

VOID SHIELD

This is a per-app firewall using Android's VPN API. It is not a brand-name VPN service. When you first enable it, Android will ask you to trust a VPN connection — that is normal.

- › Wire Gauge (top) = how strong your phone↔router link is right now (Mbps). Refresh anytime.
- › Leave most apps alone at first. Only block apps you understand.
- › Transmitting now shows friendly app names + upload/download rates.
- › Access log = who tried to talk on the network.
- › If another VPN app fights it, turn one of them off.

WAR ROOM

ArchAngels watch for odd network behavior (Wi-Fi changes, DNS weirdness, after-hours churn). You get alerts. You choose the response. Drills are practice only — not real attackers.

- › Drill / Simulate = safe practice. Mark false alarm if you were testing.
- › Demon log = timeline of what happened. Local by default; share only if you choose.
- › Seraphim = Apps scan, Files scan, Dust Sweep (junk install leftovers), Abyss contain/restore.
- › Lake of Fire = permanent destroy path. Only when you mean it. Prefer Contain first.

DECOY ID

Optional. Creates decoy traffic and persona trails so someone sniffing the wire has more noise than signal. You do not need this on day one to be protected.

WHEN YOU GET A REAL ALERT

1. Read the card. Did you just change Wi-Fi on purpose?
2. If yes → False alarm / ignore.
3. If no and it feels wrong → stay calm. Prefer decoy responses over panic.
4. Note the time. Check Demon log later.
5. Email admin@alphaomegatech.net if it keeps firing with no explanation.

Rune Term (when you are ready)

OPTIONAL · POWER USERS · STILL NO ROOT

Rune is a full Linux-style shell living inside Void Walker. Your phone becomes the cockpit. Heavy work stays on PCs, Pis, and labs you already own. You do not need Rune for daily armor.

SAFE FIRST COMMANDS

Open Void Walker → Rune Term. Prefer one session (S1). Type carefully.

vw doctor	Health check: tools, key, mesh, LAN, SSH smoke.
vw hosts	List saved host profiles.
vw ssh <alias>	Connect to a machine you configured (e.g. home lab).
vw shield status	Shield state from the shell.
vw control ping	Cockpit control plane alive check.
pkg install <name>	Install packages inside Rune (self-heals on family builds).

Guides: voidwalker.app/docs/rune · PDF quick ref: voidwalker.app/downloads/Rune-Quick-Reference.pdf

Mesh from anywhere (Tailscale how-to): voidwalker.app → #mesh-anywhere (after Terms agree).

PASSWORDLESS SSH (later)

When you want the phone to open your PC without typing a password every time, Rune can help generate a key. Only do this on machines you own. Secrets stay on your host.

- › In Rune you may run: `bash ~/rune-ssh-setup.sh` (when present).
- › Copy the printed public key into the PC's `authorized_keys`.
- › Then: `vw ssh <your-alias>`

DO NOT

Do not paste random commands from strangers. Do not root the phone for Void Walker — you do not need to.

Key · support · you are live

LIFETIME · UP TO 3 DEVICES · SAME KEY FOREVER ON THIS CHANNEL

YOUR LIFETIME KEY

Looks like: VW-D-XXXX-XXXX-XXXXX

Save: password manager + screenshot + this email thread.

Same key unlocks future packages on voidwalker.app (no re-buy).

Works on up to 3 devices. Clear app data? Re-enter the SAME key.

We do NOT mint a second key if you lose it — keep this copy.

Support can help resend the same key from a paid Stripe session only.

10-MINUTE CHECKLIST

- › APK installed · package is Void Walker (Family / direct).
- › Terms agreed · key activated on Wi-Fi once.
- › Home → Full Armor of God ON.
- › Notifications allowed.
- › Call Gate: at least one VIP saved (someone you love).
- › Key stored offline.
- › Bookmark voidwalker.app/whats-new for new chapters.

SUPPORT

Email: admin@alphaomegatech.net

Include: the email you used at Stripe checkout + what you tried.
